SUMMARY

Final-year B. Tech Computer Science and Engineering student with strong skills in Python, React, Flask, JavaScript, SQL, and web application development. Experienced in developing full-stack projects with secure authentication, database integration, and responsive user interfaces. Eager to contribute to software development teams while continuously learning modern technologies.

EDUCATION

SRM Institute of Science and Technology

B.Tech in Computer Science and Engineering

CGPA: 8.5/10

Jun. 2023 – May 2027

St. Joseph Matriculation Higher Secondary School

Higher Secondary Education (12th)

GPA: 7.1/10

Jun. 2021 – Apr 2023

PROJECTS

Secure File Sharing System using Blockchain & ML (Minor Project)

Jan 2026 - May 2026

- Developed a secure cloud file sharing platform using FastAPI, integrating AES (Fernet) encryption, SHA-256 hashing, and Ethereum blockchain to ensure confidential, tamper-proof, and verifiable file storage.
- Implemented JWT authentication, Role-Based Access Control (RBAC), Redis rate limiting, PostgreSQL, MinIO object storage, and an ML-based anomaly detection module to monitor suspicious user activity with comprehensive audit logging.
- Developed secure REST APIs for file upload, download, integrity verification, and audit logging, ensuring encrypted file processing with real-time blockchain-based validation and access monitoring.

AI-Based Crop Recommendation Platform (AgriSense)

Aug 2025 - Oct 2025

- Built an AI-driven agricultural platform using Google Gemini API for crop disease detection, personalized recommendations, and real-time market insights—integrated weather forecasting, web scraping, and an e-commerce marketplace for farmers.
- Implemented multilingual support for 22 languages, JWT authentication, and role-based access control, enabling secure and scalable usage for both farmers and vendors.
- GitHub:** <https://github.com/premkumark20>

RentyZoneSite – Rental Management System

May 2025 – Aug 2025

- Built a full-stack multi-tenant rental management system to automate property administration, tenant lifecycle tracking, utility billing, and PDF invoice generation for landlords and tenants.
- Implemented multi-property administration, utility billing automation, and secure authentication using bcrypt and session-based access control.
- GitHub:** <https://github.com/premkumark20>

TECHNICAL SKILLS

Programming: Python, Java, SQL, HTML, CSS, JavaScript

Frameworks: Flask, FastAPI, React, Bootstrap, Flutter, Google Cloud Platform

Databases: MySQL, SQLite, CSV-based persistence

Security: JWT Authentication, bcrypt, Role-Based Access Control
